

TrafficLite

Why install a TrafficLite?

Many crane users demand that traffic light indicators are fitted in addition to a load display. This always requires additional hardware.

TrafficLite is a 4 set-point load limiter that is specifically design as a drop in substitute for an Abus LIS controlling a single traffic light load display. Each of the 4 outputs can be independently programmed for any load level and can also be configured as either normally open or normally closed.

Configuration of TrafficLite is wireless via Bluetooth and TrafficLite is compatible with SoleDigital's HiBeam load display. In addition to digitally interfacing to ABUS' LIS controllers, TrafficLite can accept any other type of load signal.

Technical Details

PHYSICAL

Dimensions (mm): 155 x 90 x 58
Mounting: 30mm DIN Rail
Operating temperature range (°C): -20 to 85

ELECTRICAL

Supply voltage: 24-240VAC
Supply current: 7-12mA
Fault output contact ratings: 240VAC, 4A

About CASWA

CASWA is an Australian company that designs electronics and software for collecting, analysing and disseminating data to help asset owners and maintainers make better business decisions. CASWA also manufactures and distributes the Sole Digital range of asset management products at a facility in Perth, Western Australia, many of which have been developed specifically to support the crane industry.

More information on TrafficLite is available from www.soledigital.com.au/trafficlite.html or contact us directly at:
